٠٤.

## **CLAIMS 1-93 ARE PRESENTED FOR EXAMINATION**

## **DETAILED ACTION**

## Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claims 1-37 and 64-93 drawn to a method for inhibiting β-secretase activity by administering compounds, classified throughout class 514.
- II. Claims 38-43 drawn to a method for inhibiting amyloid precursor protein (APP) cleavage in a reaction mixture at a site between Met596 and Asp597, numbered for the APP-695 amino acid isotype; or at a corresponding site of an isotype or mutant thereof, comprising exposising said reaction mixture to an effective inhibitory amount of a hydroxyethylene compound, classified throughout class 424.
- III. Claims 44–46 drawn to a method for inhibiting production of amyloid beta peptide (Aβ) in a cell by administering to said cell an effective inhibitory amount of a hydroxyethlene compound classified throughout class 514,
- IV. Claims 47-48 drawn to a method fro inhibiting the production of betaamyloid plaque in an animal by administering to said animal an effective inhibitory amount of a hydrovyethylene compound classified throughout class 514.

Art Unit: 1617

V. Claims 49-59 drawn to a method for treating or preventing a disease characterized by beta-amyloid deposits in the brain by administering to a patient an effective therapeutic amount of a hydroxyethylene compound classified throughout class 514.

VI Claim 60 drawn to a composition comprising β-secretase complexed with a hydroxyethylene compound classified throughout class 514.

VII. Claims 61-63 drawn to a method for producing a β-secretase complex comprising exposing β-secretase to a hydroxyethylene compund classified throughout class 514.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 38, 44,47, 49, 60 and 61 are generic

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1617

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Further restriction may be required.

No telephone communication was made on this restriction requirement because the restriction is complex. (MPEP 812.01).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Criares whose telephone number is 308-4607. The examiner can normally be reached on 6:30 A.M. to 5:00P.M. Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan can be reached on 305-1877. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-1235.
